

ADNAN AHMED BHAMESHAN

☎ +91 9959455183 — ✉ adnanbhameshan@gmail.com — **in** linkedin.com/in/adnanbhameshan
🐙 github.com/adnanbhameshan

Full Stack Developer specializing in MERN stack with experience in building scalable web applications and blockchain-based systems. Proficient in leveraging AI-powered tools such as ChatGPT, Claude, and Antigravity to accelerate development, optimize code quality, and enhance problem-solving efficiency. Passionate about building modern, efficient, and intelligent software solutions.

Education

Vidya Jyothi Institute of Technology

Bachelor of Technology in Information Technology - CGPA: 7.78

2022 - 2025

Hyderabad, India

Quli Qutub Shah Government Polytechnic collage

Diploma in Electrical and Electronics Engineering - CGPA: 8.55

2019-2022

Hyderabad, India

Core Skills

Programming Languages: Python, JavaScript, SQL

Tools & Platforms: Github, Antigravity, Claude, Chatgpt

AI & NLP: TF-IDF, Cosine Similarity, Basic NLP

Backend: Node.js, Express.js, REST APIs, FAST APIs

Frontend: HTML5, CSS3, Tailwind CSS, React.js

Databases: MongoDB, MySQL

Concepts: Data Structures, OOP, DBMS, Operating Systems

Projects

Trackr – AI-Enhanced Job Tracking System) | [MERN Stack](#), [FastAPI](#), [NLP \(TF-IDF\)](#), [Anti-Gravity](#) | [View App](#)

- Built a job tracking web application to manage applications, deadlines, and view progress via Dashboard
- Integrated an AI-powered Resume Analyzer using NLP techniques (TF-IDF, cosine similarity) to match resumes with job descriptions
- Built a Python-based AI service (FastAPI) and connected it with Node.js backend via REST APIs
- Implemented resume parsing, skill extraction, match scoring, and improvement suggestions
- Leveraged AI tools like Anti-Gravity and Claude to accelerate prototyping and debugging, reducing development time by **40%**
- **Technologies:** MERN Stack, Antigravity, Claude, Vercel, Render

VJIT Sports-Scheduler | [Node.js](#), [PostgreSQL](#), [Tailwind CSS](#) 🐙

- Improved sports session scheduling efficiency by **30%** through role-based workflows for administrators and users.
- Reduced manual coordination efforts by **40%** by centralizing session control, reporting, and participant management.
- **Technologies:** Node.js, PostgreSQL, JavaScript, Tailwind CSS

Decentralized Voting System | [Blockchain](#), [Solidity](#), [MongoDB](#) 🐙

- Enabled secure and transparent voting for **100+ registered voters** using Ethereum smart contracts to ensure immutability and trust.
- Eliminated duplicate and unauthorized voting by enforcing **100% voter validation** through blockchain-backed authentication.
- Simulated end-to-end election flow on a local Ethereum network, reducing vote tampering risk by **90%** during testing.
- **Technologies:** Solidity, Ethereum, MongoDB, JavaScript, React, Ganache, MetaMask

Certifications and Achievements

React Front-End Development Certification — HackerRank [Certificate](#)

Programming Essentials in Python from Cisco [Certificate](#)

Advanced Data Analytics Capstone — Google (Coursera) [Certificate](#)

Nutanix Certified Professional – Multicloud Infrastructure (NCP-MCI) [Certificate](#)

IELTS — English Proficiency Certification [Certificate](#)

Inter-college Technical Quiz Runner-up among **250+** participants. [Certificate](#)

Additional Information

- Currently learning Generative AI concepts including LLMs, prompt engineering and more through Tutedude platform
- Gaining hands-on exposure to NLP, machine learning fundamentals, and building AI-powered applications
