SUMMARY

Software Engineer with **1+ years of professional experience** building, deploying, and supporting production web applications, with **hands-on AWS exposure** and a strong foundation in **cloud infrastructure**. **AWS Certified Solutions Architect – Associate** with practical experience across **cloud deployment, Linux environments, networking** fundamentals, monitoring, application troubleshooting, and Git-based development workflows. Experienced in diagnosing application and service issues across distributed environments, with additional exposure to cloud infrastructure and automation under senior engineering guidance. Transitioning into **Cloud Support Engineering** with a production-focused approach to troubleshooting, **reliability**, and continuous improvement.

CERTIFICATES

AWS Certified Solutions Architect – Associate (SAA-C03)
Amazon Web Services (AWS) | **2026**

SKILLS

Cloud & Infrastructure — **- AWS:** EC2 • S3 • IAM • RDS • VPC • Security Groups; **Infrastructure:** Cloud Deployment • Environment Configuration • Infrastructure Troubleshooting
Linux & Networking — Linux/Ubuntu • Bash • Python • TCP/IP • DNS • SSH • VPC Networking
Monitoring & Operations — CloudWatch Metrics & Logs • Application Monitoring • Incident Triage • Troubleshooting • Root-Cause Investigation
DevOps & Automation — Git • GitHub • CI/CD • Docker • Terraform • GitHub Actions
Application & API — Node.js • Express.js • FastAPI • RESTful APIs • TypeScript • JavaScript
Databases — PostgreSQL • MongoDB • MySQL
Security — IAM • Access Control • Secure Application Configuration

EDUCATION

Vidya Jyothi Institute of Technology (VJIT),
Bachelor of Technology in Information Technology
2022 – 2025 | Hyderabad, India
CGPA: 7.78

Quli Qutub Shah Government Polytechnic College,
Diploma in Electrical & Electronics Engineering
2019 – 2022 | Hyderabad, India
CGPA:8.55

INTERESTS

Freestyle & Arm Wrestling • Running & Cycling • Sports & Outdoor Activities • Social Networking • Continuous Learning

PROFESSIONAL EXPERIENCE

Software Engineer — Full Stack Development & Cloud Deployment,
SAHL Business Solutions
04/2025 – 07/2026 | Hyderabad
- Designed, developed, and maintained production web applications using **React, TypeScript, Node.js, Express.js, and FastAPI**, contributing across application development, APIs, databases, deployment, and production support.
- Supported **cloud application deployments and production environments**, assisting with environment configuration, service integration, release activities, and troubleshooting under senior engineering guidance.
- Diagnosed and resolved **application, API, database, and service-integration issues** across development and production environments, using structured debugging and root-cause investigation.
- Worked with **Linux/Ubuntu, Git/GitHub, RESTful APIs, MongoDB, and PostgreSQL**, supporting application configuration, service troubleshooting, and development-to-deployment workflows.
- Collaborated within **Agile/Scrum engineering teams**, participating in code reviews, issue resolution, testing, deployment activities, and cross-functional technical coordination throughout the software development lifecycle.

PROJECTS

Cloud Infrastructure Platform — AWS & Terraform, *AWS • Terraform • Linux • VPC • EC2 • RDS • S3 • IAM • CloudWatch • Docker • GitHub Actions*
- **Provisioned a multi-tier AWS environment using Terraform**, implementing VPC networking, public/private subnets, route tables, security groups, and controlled application-to-database connectivity.
- Deployed **EC2, Application Load Balancer, and RDS PostgreSQL**, configuring health checks, secure connectivity, and infrastructure components for a production-style workload.
- Implemented **CloudWatch metrics, logs, and alarms** to support infrastructure monitoring, incident triage, and root-cause investigation.
- Containerized application services with **Docker** and implemented a GitHub Actions workflow for automated testing, image builds, and deployment.
- Managed infrastructure using **Terraform modules and remote state**, making provisioning repeatable and reducing manual configuration.

NEXUS — AI Developer Command Center,
AWS • EC2 • S3 • IAM • RDS • FastAPI • PostgreSQL • React • TypeScript
- **Designed, deployed, and operated** an AI-powered developer portfolio platform, managing application services, cloud deployment, environment configuration, and production operations.
- Migrated the backend infrastructure to **AWS EC2**, integrating **S3, IAM, and RDS** while managing application configuration and service connectivity.
- Implemented a FastAPI backend with PostgreSQL and Gemini 2.5 Flash, troubleshooting **API, database, environment, and service-integration issues** across deployment environments.

Trackr — AI Job Tracking & Resume Analysis Platform,
AWS • Vercel • Render • Node.js • Express.js • FastAPI • MongoDB
- **Designed and deployed** a full-stack platform spanning React, Node.js/Express, FastAPI, and MongoDB, supporting application tracking, analytics, authentication, and AI-based resume analysis.
- Integrated a Python/FastAPI microservice with the Node.js backend through **REST APIs**, troubleshooting service communication and application issues across environments.
- Deployed application services across **AWS, Vercel, and Render**, managing environment configuration, production deployment, custom-domain routing, and service integration.
